

## Global Film Challenge Submission Criteria and Upload Procedures

### Here are the specifications for your film submission

File container: MP4  
Video codec H.264  
Bitrate 10-20 mbit/s VBR or RF 18 (Handbrake)  
Maximum file size 2 GB

### Uploading your film is a 4 Step Process

***NOTE: The Safari web browser is unstable during upload. We recommend using a different browser (Firefox, Chrome, etc.)***

1. Log into the 48hourfilm.com website and enter the details of your film in the Wrap Up Form
2. Log into Cinema48.com and go to Project Manager. Your film should appear. Click "Select Film"
3. Click Edit Film Details and enter information about your film. Click Save
4. Click Upload Film and select your file for upload

PRO TIP 1: You can enter information on your Wrap Up form (located on the 48hourfilm.com website) earlier in the weekend. Do it Sunday morning, and you don't have to worry about it at the last minute.

PRO TIP 2: You can upload one version of your film well before deadline while you continue to make your final edits. Then you know you have one submitted version in case something goes wrong at the last minute.
